

Product information

In addition to our low-strength anaerobic surface seal AFD 2000 green, we now have included in our product range AFD 2018 red.

AFD 2018 red is a solvent-free, stable sealing compound. It is ideal for sealing torsion-resistant metal parts with a flat, planar sealing surface, for example, on housing and bearing covers or on flanges used in the manufacturing of engines, transmissions, and aggregates.

Characteristic	value range unit
Sealing function	anaerobic (without air) metal on metal
Temperature stability	-55°C to +180°C
Resistance	resistant to water, mineral oils (also with additives), lubricants, fuels, organic solvents, and coolant additives
Largest fillable gap	0.5 mm
Final strength	6 - 24 hours

Form of supply

Plastic concertina bottle	75 ml	Elring 461.680
