OM 904 LA

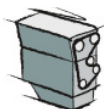

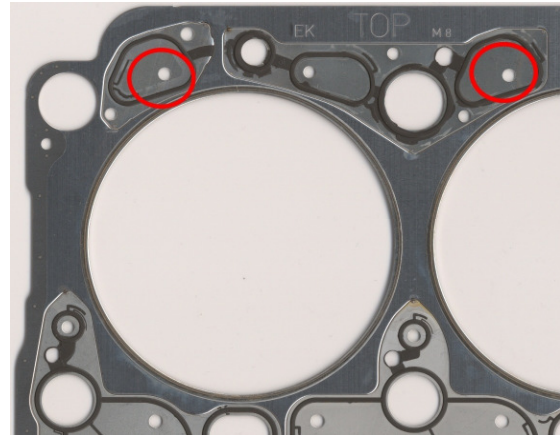

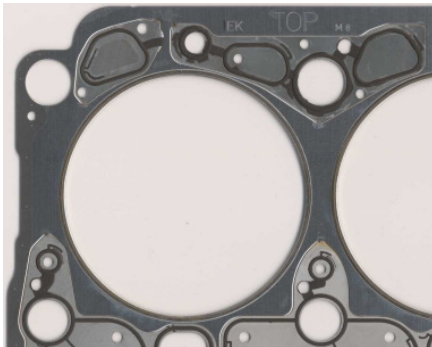

OM 906 LA

OM 924 LA

OM 926 LA

Since the introduction of the OM 904 LA / 906 LA / 924 LA / 926 LA engine models, ElingKlinger has been a series supplier and expert partner in the aftermarket.

During typical daily operation, the engines are subjected to extreme loading, which can cause the formation of vapor bubbles. The local increase in pressure in the cooling system is dissipated by design with precisely located bore holes (see illustration), which optimizes the service life of the engine.

(only for comparison)

OM 904 LA	082.724 (082.723)	904 016 13 20 (904 016 11 20)
OM 906 LA	082.734 (082.733)	906 016 14 20 (906 016 12 20)
OM 924 LA	353.512 (082.743)	924 016 11 20 (924 016 07 20)
OM 926 LA	490.150 (082.753)	926 016 12 20 (926 016 08 20)
