

New special tool from Elring

Oil seal hook – Universal extraction tool for shaft seals

With the new **Oil seal hook**, Elring offers a practical specialist tool for easy and professional removal of shaft seals.

The 2-piece set is suitable for all standard shaft seal sizes and can be used in a wide range of applications on engines, gearboxes or axles.

B56.210

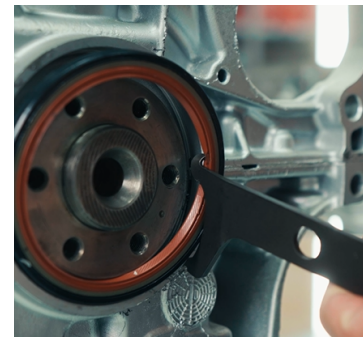

Your benefits at a glance

- Efficient and time-saving removal of shaft seals
- Ideal for hard-to-reach areas
- Suitable for a wide range of applications and manufacturers
- Prevents damage to shafts and components caused by improper tools
- Non-slip handles for precise handling

Technical note

The tool is based on the OE special tool T20143 and meets the same functional requirements, and is also suitable for a wide range of additional applications.
