

Gaskets and Gasket sets suitable for BMW M10

The BMW M10 is a robust inline four-cylinder spark-ignition engine that was produced from 1962 to 1988 and offered in variants such as the M10B15, M10B18, and M10B20. With a displacement of up to 2.0 liters, a maximum bore of 89 mm, and a stroke of up to 84 mm, it delivers up to 125 kW (170 hp) in its most powerful configuration. The M10 features a single overhead camshaft (SOHC), an aluminum cylinder head, and was installed in numerous models, including the BMW 1500, 1600, and 2002. Originally developed for production vehicles, it also served as the foundation for the highly successful Formula One engine, the BMW M12/13. Thanks to its reliability and performance capabilities, it is regarded as a technical cornerstone of BMW's engine development.
