

Gaskets and Gasket sets suitable for BMW M52

The BMW M52 is an inline six-cylinder spark-ignition engine that was produced from 1994 to 2000 and offered in variants such as the M52B20, M52B25, and M52B28. With a displacement ranging from 2.0 to 2.8 liters, a maximum bore of 84 mm, and a stroke of up to 84 mm, it delivers up to 142 kW (193 hp) and 280 Nm in its most powerful configuration. Technically, the M52 features a dual overhead camshaft (DOHC) valvetrain with four valves per cylinder. Until 1998, the M52 was equipped with Single-VANOS; only with the technical update was Double-VANOS introduced for both intake and exhaust camshafts. Its aluminum engine block and aluminum cylinder head provide a well-balanced combination of low weight, structural rigidity, and durability. The M52 was used in various models, including the E36 and E39, and is regarded as a smooth-running and efficient inline-six engine.
