

Gaskets and Gasket sets suitable for BMW M54

The BMW M54 is an inline six-cylinder gasoline engine produced from 2000 to 2006 and offered in variants such as the M54B22, M54B25, and M54B30. With a displacement ranging from 2.2 to 3.0 liters, a maximum bore of 84 mm, and a stroke of up to 89.6 mm, it delivers up to 170 kW (231 hp) and 300 Nm in its most powerful configuration. Technically, the M54 features a DOHC valvetrain with four valves per cylinder and a fully variable Double VANOS system for controlling both the intake and exhaust camshafts. The aluminum crankcase with cast-iron cylinder liners, along with the aluminum cylinder head, provides a balanced combination of weight reduction, thermal stability, and durability. The M54 was used in numerous models, including the E46, E39, and the E60/E61 series.
